

DJILBA WILDFLOWER FESTIVAL ESPERANCE SAND DUNES AND SEASHORE

Nature By Design Floral Adaptations in Botanical Art **Sunday, September 20** Esperance Civic Centre Main Foyer 1-4pm

What To Expect

A bespoke workshop designed to elevate botanical art skills, while taking a deep dive (pardon the pun) into the ecology of 'Sand Dune sand Seashore' coastal flora.

Join Katie White, local botanist and artist, for an immersive three hour workshop unpacking in tandem visual art design theory, watercolour use, and botanical artwork techniques and morphological adaptations of coastal flora as the artwork subject.

Meet Your Presenter

Katie is a practicing Botanist and Environmental Scientist (B.Sc Hons).

But she realised a long time ago that science was only one half of her connection to flora, and so her interlinked and intertwined love of Botanical Science and Botanical Art was born.

Caladenia Co. began as a way for Katie to explore her scientific insights as a botanist and connection to the landscape as an artist.

She now dabbles in many areas, all connected by wildflowers: identifying flora, botanical art, guided walks, workshops, ephemeral bush art, photography, and landscaping..... Anything to do with plants!
